

Our Cyber Essentials Assist Consultancy helps organisations to prepare for the Cyber Essentials Online Assessment, increasing your chances of passing first time.

During the online Consultancy we will discuss the requirements of the Standard, perform a high level gap analysis against the standard and provide guidance on any required changes. Following the consultancy you will be equipped with the knowledge required to attain Cyber Essentials accreditation.

What happens during the Online Consultancy?

A typical Cyber Essentials Consultancy includes the following:

Initial Meeting:

- Introductions
- Overview of Cyber Essentials

Introduction to Security Controls:

- Importance of the 5 key security controls
- Overview of Secure Configuration requirements
- Overview of Firewalls requirements
- Overview of User Access Controls requirements
- Overview of Patch Management requirements
- Overview of Malware Protection requirements

Introduction to the Certification Process:

- Overview of the Assessment Process
- Guidance on defining the Scope
- High Level Gap Analysis

What Happens Next?

A non-conformance checklist will be produced highlighting any non-conformances and necessary actions. It is essential that you address these non-conformances before proceeding to the Cyber Essentials Online Assessment. A successful assessment will lead to you being awarded the Cyber Essentials Certification.
